

Construction Notice

May 17, 2017

The first phase of roadway work is tentatively scheduled to start soon after Memorial Day. We will post and/or distribute additional notices as we receive more detail on the contractor's schedule.

Prior to roadway construction, the City provides all property owners with the opportunity to replace their water or sewer line. Please note that the private water and/or sewer service work must be contracted and paid for by the property owner.

Since the road will be under construction the roadway can be patched using the following methods resulting in a cost savings to the home/business owner. Please see the chart below of a list of streets and corresponding patching requirements.

- **Grind and Overlay Areas-** The roadway can be patched with concrete in lieu of concrete with asphalt on top.
- **Roadway Reconstruction Areas-** The excavated area can be left as gravel. (Please note that it must be maintained until road construction. High traffic areas may require cold patch.)

Please contact Mark Bushnell, City Engineer if you are interested in replacing your water and/or sanitary sewer service prior to roadway construction. Please do not proceed without contacting the City as we need to verify service locations. Thank you as we work to improve the City's infrastructure.

Mark D. Bushnell P.E. , City Engineer
 City of Sycamore
 T: (815) 895-4557
