

Construction Notice

MAY 2ND to MAY 4TH

AC Pavement Striping will soon begin a microsurfacing project on West and South Prairie Drive. This is a single step rehabilitative measure that provides a new surface to the roadway.

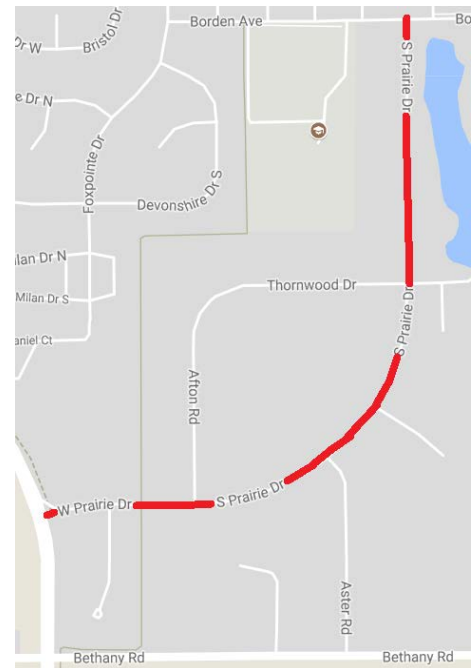

WORK IS SCHEDULED TO START ON WEDNESDAY MAY 2ND AND LAST UNTIL FRIDAY MAY 4TH (WEATHER DEPENDENT).

Traffic

Through traffic will be rerouted during construction. **One lane of traffic will remain open at all times, but please expect delays as flaggers will need to direct traffic.** There may also be times, when drives are not accessible for up to 30 minutes.

Roadway Appearance

Please do not attempt to drive on it before then or you may damage the finished product as well as your vehicle. The finished appearance will differ from new asphalt. Microsurfacing has a gravelly-textured brown finish. Over a period of three to four weeks the roadway will resemble other streets. We will schedule post-sweeping a few weeks after the work has been completed to pick-up any loose material.

The City of Sycamore appreciates your patience. If you have any questions about this project, please contact the Sycamore Engineering Department at (815) 895-4557.
