Construction Notice

The City of Sycamore has contracted Corrective Asphalt Materials, LLC (CAM) of Sugar Grove, IL to perform preventative asphalt maintenance on your street.

Work is tentatively scheduled to start between Friday May 4th & Tuesday May 8th.

Work will begin the day after “NO-PARKING” signs are placed.

(Please be aware that this treatment is weather dependent, if the forecast calls for rain, operations will be delayed.)

During this time;

- When posted please follow all posted signs, as applicable (No Parking, Road Construction Ahead, Fresh Oil etc.)
- When posted, there will be no on street parking between the hours of 7:00am and 5:00pm.
- If you have a lawn sprinkling system that sprays onto the street pavement. It must be turned off during and one day following the work. Water can reduce the effectiveness of the rejuvenator.

Please contact the City at 815-895-4557 if you require special accommodations. Thank you for your patience as we work to improve the City's infrastructure

F.A.Q.s

Why is this product being applied to my road?

CAM, LLC will be applying Reclamite Maltene Based Rejuvenating Agent to your roads. Reclamite is a product designed to extend the life of the pavement by sealing the pavement from the elements. This preventative maintenance effort will minimize the need for more costly and disruptive methods of street repair.

How long does the process take? Once the contractor begins on your street, the process will only take a few hours. Once the road has been sanded the road will be fully opened to traffic.

When can I drive on the road? You can exit your driveway and drive through the work area, but please go slow and stay on the sanded area. Be advised that driving onto a driveway before the contractor is finished sanding may cause the driveway and sidewalk to become temporarily stained.

When will the road be cleaned up? After the product is applied, an application of sand/screenings will be applied to the road. This is not permanent. The screenings will be swept up a day or two after the product is applied.

This product is environmentally safe and will extend the pavement's life.
